SHREYAS SARKAR

9679944879 | sarkarshreyas853@gmail.com | github.com/sarkarshreyas853-droid

PROFESSIONAL SUMMARY

Final-year B.Tech (CSE – AI & ML) student with hands-on experience in generative AI, large language models, prompt engineering, SQL-based analytics, and data analysis. Completed a Deloitte data analytics virtual experience, a graded virtual AI internship, and multiple industry certifications. Built and published an AI research agent with built-in fact-verification rules. Seeking AI training, data annotation, data analytics, or AI engineering roles and internships where careful evaluation, structured analysis, and clear prompt design add value.

EDUCATION

Techno India University
B.Tech, Computer Science & Engineering (AI & ML) | Expected Graduation: 2027

EXPERIENCE

Deloitte Data Analytics Virtual Experience | via Forage | September 2026

- Completed practical, job-based tasks in data analysis and forensic technology, modeled on real Deloitte client work.
- Analyzed structured datasets to spot patterns, anomalies, and key findings, and summarized conclusions clearly for a non-technical audience.
- Applied structured, step-by-step analytical thinking to simulate the data investigation used in professional advisory engagements.

Virtual AI Intern | Techno Billion AI Center for Excellence & Empowerment | February 2026 | Grade A

- Completed a structured virtual internship on ChatGPT and applied AI, earning Grade A.
- Learned how large language models work and practiced writing, testing, and refining prompts to get accurate, well-structured outputs for summarizing, drafting, analysis, and problem solving.
- Used generative AI tools in practical workflows and evaluated the quality, accuracy, and limitations of their outputs.

PROJECTS

AI Research Assistant Agent | github.com/sarkarshreyas853-droid/ai-research-ai-agent

- Designed and configured an AI agent (SketricGen, GPT-4.1 Mini with live web search) that turns a research topic into a structured, sourced brief, with fact-verification rules built into the system prompt.
- Published the full configuration, a working API client script, and sample output to a public GitHub repository.

CERTIFICATIONS

- **Data Analytics Job Simulation** | Deloitte / Forage | September 2026. Data analysis, forensic technology, and presenting findings from data.
- **Get Started with SQL Analytics and BI on Databricks** | Databricks / Simplilearn SkillUp | September 2026. Writing SQL queries, analyzing data in Databricks SQL, and the basics of BI dashboards.
- **Applied AI Foundations** | OpenAI Academy. How generative AI works and how to use ChatGPT and OpenAI tools effectively and responsibly.
- **Foundations in Generative AI** | IBM SkillsBuild. Core generative AI and LLM concepts, real-world use cases, limitations, and ethical considerations.
- **Strategic Planning in the AI Age** | HP LIFE / HP Foundation | September 2026. Using AI tools to support strategic planning and business decision-making.
- **Virtual Internship: ChatGPT & AI Learning** | Techno Billion AI | February 2026 | Grade A.

SKILLS

- **AI & Prompting:** prompt engineering, prompt refinement, contextual understanding, generative AI, ChatGPT, OpenAI platform fundamentals, AI agent configuration, output evaluation
- **Data:** SQL, Databricks SQL Analytics, data analysis, forensic technology, business intelligence basics
- **Programming & ML:** Python, Data Structures, Machine Learning fundamentals
- **Business:** applying AI tools to strategic planning and decision-making
